

LRI London Research International

Renewable Electricity Incentives
in the OECD, China and India, 2010/2011:
Investment and Operating Support Programmes

THE MOST COMPREHENSIVE AND UP-TO-DATE RENEWABLE ELECTRICITY INCENTIVES REPORT

Paperback: 151 pages
Publisher: London Research International,
August 2010
ISBN: 978-0-9558079-8-5
Price: £199.00

REPORT LAYOUT

1. INTRODUCTION
2. COUNTRY ANALYSIS
 - Australia
 - Austria
 - Belgium
 - Canada
 - Chile
 - The Czech Republic
 - Denmark
 - Finland
 - France
 - Germany
 - Greece
 - Hungary
 - Iceland
 - Ireland
 - Italy
 - Japan
 - Republic of Korea
 - Luxembourg
 - Mexico
 - The Netherlands
 - Norway
 - New Zealand
 - Poland
 - Portugal
 - Slovakia
 - Spain
 - Sweden
 - Switzerland
 - Turkey
 - The United Kingdom
 - The United States of America
 - China
 - India
3. COUNTRY RANKING

RENEWABLE ELECTRICITY INCENTIVES IN THE OECD, CHINA AND INDIA, 2010/2011: Investment and Operating Support Programmes

Renewable electricity is being deployed ever more rapidly as developed countries acknowledge both the urgent need to cut GHG emissions and the contribution that renewable energy can make towards energy security. However, the high cost of deployment is such that government incentives continue to be required.

Incentive schemes have already been established in various countries to attract investor capital and spur development. A major challenge for renewable power developers now lies in identifying which of these incentive schemes offer good value for money and the predictability needed to justify the initial capital outlay.

This report is an authoritative source allowing for quick and easy comparison of the latest incentives on offer for different renewable technologies in 31 OECD countries, China and India. Combining key electricity market statistics with an analysis of operating and investment incentives for each country, the report provides concise but comprehensive information regarding the climate for renewable electricity investment.

METHODOLOGY

London Research International (LRI) has drawn on its network of international consultants to conduct extensive research, based on a range of data sources in multiple languages, to secure some of the most up-to-date published information on the renewable electricity sector currently available.

Using experience gained from previous publications on the European renewable electricity sector, LRI has compiled a comprehensive report offering country-by-country information on emissions targets and electricity mixes, as well as renewable electricity operating and investment support incentives.

TARGET MARKET

All parties with an interest in the renewable electricity sector including **investors**, **policy makers** and **sector specialists**.
